

K-12 Educational Facilities

Public School Project List

RWB has provided MEP consulting services to over thirty different independent school districts with over three hundred successful projects within the last five years. Our experience includes new construction, additions, renovations, storm shelter reviews, and MEP system upgrades. RWB designed multiple projects, mostly educational type, which have received LEED certification ratings and some K-12 schools which received the Collaborative High Performing Schools (CHPS) rating. A significant amount of our work is in the educational market.
